Quadri Ismail

Senior Product Designer turning complex SaaS into simple,
shippable products | Fintech · GovTech · AI
Lagos State, Nigeria

Summary

Product Designer with 6+ years shipping SaaS products across Fintech, Healthcare, GovTech, and AI-powered analytics. I have worked on platforms that now serve over 40M users worldwide. What I bring to your team: I work closely with PMs, engineers, and data teams to take on complex product challenges all the way from research to shipped UI. I build out scalable design systems that cut down engineering handoff time, break down ambiguous business goals into clear product decisions, and follow through on every release. Work I have carried out:- Lean Business Services: AI analytics and data governance SaaS- Nusuk and Ministry of Hajj: Saudi Arabia's digital pilgrimage platform (40M+ users)- Chisquares: global research tech platform for academics and enterprises- Federal Ministry of Education Nigeria: first national digital performance system for 67,000+ civil servants Results I have shipped:- Cut design-to-dev handoff time by 15% with a unified design system- Reduced user errors by 70% on a blockchain onboarding flow- Sped up approval workflows by 80% on a national government platform- Lifted engagement and retention by 30% on an AI research platform Tools: Figma, FigJam, Protopie, Adobe XD, Miro, Notion, Jira Industries: Fintech, Healthcare, GovTech, AI and Data SaaS, Web3 Outside client work, I mentor product designers and UX designers from African and emerging markets who want to build a career and turn their skills into steady income. Portfolio: www.behance.net/quadriismail Email: quadrihorlar@gmail.com Open to senior and lead product design roles. Full-time, contract, remote, or relocation.

Experience

Lean Business Services
Senior Product Designer
December 2024 - April 2026 (1 year 5 months)
Riyadh, Saudi Arabia

I work on product design and UX strategy for two enterprise SaaS platforms: Lean Insight, an AI analytics and data governance tool, and AXN Terminology Engine, an AI-powered medical coding platform.

For Lean Insight, I design analyst-to-AI workflows that let finance, sales, and marketing teams query dashboards, pull up natural-language summaries, and drill down into data risks and governance actions. I work closely with data scientists, PMs, and engineers to build out features that help teams act on data faster.

For AXN, I carry out UX design for an NLP-powered medical coding platform that handles ICD-10-CM, CPT, and SNOMED CT classification. I cover subscription management, team collaboration, data export, and the end-to-end experience for hospital and insurer clients.

Key results I have shipped:

- Cut design-to-development handoff time by 15% through structured component documentation
- Reduced design revisions by 20% by aligning stakeholder expectations and user needs earlier in the process
- Mapped user journeys and information architecture for hospital and insurer clients
- Partnered with data scientists and PMs to translate governance and compliance requirements into usable interfaces

Federal Ministry Of Education, Nigeria

Senior Product Designer

July 2025 - September 2025 (3 months)

I led the design for Nigeria's first digital Performance Management System, a civil service reform platform built to serve 67,000+ federal employees across ministries, departments, and agencies.

I worked closely with government leaders, PMs, and engineers to build out an information architecture that supports dynamic roles and real-time performance tracking. I designed modular dashboards for Super Admins, Heads of Service, and Officers that helped speed up approval workflows by 80%.

Key work I carried out:

- Built out interactive org charts, performance heatmaps, and executive oversight interfaces
- Designed human-centered flows for sensitive features including sanctions, rewards, and leave management
- Optimized for low-bandwidth environments and rolled out Arabic and English localization for nationwide accessibility
- Worked with policy teams to align UX decisions with civil service regulations and data privacy requirements

Tools: Figma, Miro

Sparkr Digitals

Product Team Manager

September 2023 - September 2025 (2 years 1 month)

Lagos State, Nigeria

I led product design operations and team strategy at Sparkr Digitals, a UI/UX, branding, web, and mobile development agency delivering digital products for African startups and businesses.

Key contributions:

- Managed a cross-functional team of designers across concurrent client engagements spanning fintech, tech, and consumer sectors
- Oversaw end-to-end product design delivery from brief and discovery to final handoff across web and mobile platforms
- Set up design workflows, feedback loops, and documentation practices that improved team consistency and output quality
- Mentored junior designers on UX research, UI execution, and stakeholder communication
- Led client-facing design presentations and drove design strategy for new and recurring engagements

Tools: Figma, Notion, Jira

Chisquares

Senior Product Designer

March 2023 - February 2025 (2 years)

United States

I led end-to-end product design for Chisquares, a research analytics and collaboration platform used by academics, corporations, and public health organizations worldwide.

Key contributions:

- Built out a unified design system across web and mobile, standardizing UI components and speeding up feature delivery
- Designed survey builders, automated data-cleaning tools, and collaborative manuscript writing modules
- Drove a 30% lift in user engagement and retention through onboarding redesigns and workflow improvements
- Ran user research with data scientists, graduate students, and educators to prioritize the right product decisions
- Mentored junior designers and put in place structured design review processes
- Championed AI-assisted UX approaches across the full product launch cycle

Tools: Figma, Protopie, Notion

Takadao

User Experience Designer

February 2023 - April 2023 (3 months)

Riyadh, Saudi Arabia

I designed digital experiences for Takaturn and Takasure, two Shariah-compliant, blockchain-based cooperative finance and mutual insurance products built as DAOs on Ethereum.

Key contributions:

- Mapped out user flows for fund pooling, mutual insurance, and collective savings through smart contracts
- Designed onboarding, dashboard, and member collaboration interfaces for decentralized finance
- Delivered high-fidelity UI that aligned with Takadao's principles of transparency and ethical finance
- Ran usability testing with users from unbanked and ethical-finance communities to validate core flows

Tools: Figma, Protopie

ODEL

User Experience Design Specialist

July 2022 - February 2023 (8 months)

Riyadh, Saudi Arabia

I redesigned the digital platform for ODEL, a Saudi management consulting firm focused on organizational excellence and client engagement.

Key contributions:

- Lifted conversion rates by 25% through a full UX redesign and usability-driven UI refinements
- Built out user personas, journey maps, and information architecture for core consulting services
- Ran usability testing and rolled out validated design changes across web and mobile
- Delivered UX copy, responsive components, and a scalable Figma asset library
- Advised leadership on customer experience strategy for organizational excellence services

Tools: Figma, Adobe XD, Illustrator

PluralCode

UI/UX Designer | Team Lead

October 2021 - May 2022 (8 months)

Lagos State, Nigeria

I led design mentorship and client work at PluralCode, a leading African EdTech institute training the next generation of designers and developers.

Key contributions:

- Mentored aspiring designers through UX research, wireframing, prototyping, and design systems
- Led end-to-end design on educational and tech products from user journey through to high-fidelity UI
- Ran design workshops and cross-functional brainstorming sessions for product launches
- Put in place documentation and feedback practices that improved junior team output quality
- Collaborated with PMs and engineers in agile sprints to ship production-ready designs

Purchasa

Blockchain User Interface Designer

July 2021 - December 2021 (6 months)

Melbourne, Australia

I designed web and mobile interfaces for Purchasa, a DeFi and blockchain platform serving merchants, consumers, and retail crypto investors.

Key contributions:

- Cut user errors by 70% and lifted adoption by 25% through onboarding and navigation redesigns
- Designed flows for crypto wallet management, dApp onboarding, NFT marketplaces, and blockchain transactions
- Built interactive prototypes in Figma and Protopie for cross-functional review and stakeholder sign-off
- Aligned all UI with DeFi usability, accessibility, and security standards

Tools: Figma, Protopie

Medicarri

User Experience Designer

February 2021 - July 2021 (6 months)

Riyadh, Saudi Arabia

I designed web and mobile platforms for Medicarri, a healthcare tech company focused on improving patient and provider experiences.

Key contributions:

- Lifted user satisfaction by 15% and click-through rate by 17% through research-driven UI refinements and A/B testing
- Designed patient booking, health records, dashboards, and care coordination interfaces
- Managed and mentored a small design team, improving output by 20% through agile practices and structured feedback cycles
- Collaborated with engineering and product to translate healthcare requirements into clear, usable flows

TrueSaver

Fintech UI/UX Designer

October 2020 - April 2021 (7 months)

Lagos State, Nigeria

I designed the UI and UX for TrueSaver, a Nigerian fintech app that digitizes ajo — a traditional group rotational savings model — letting users pool funds, access interest-free loans, and manage collective finances on mobile.

Key contributions:

- Designed onboarding, savings group creation, and fund-pooling flows for first-time and repeat savers
- Built intuitive dashboards for rotation tracking, contribution status, and payout schedules
- Ran user research with target savers to break down complex rotational savings mechanics into clear, accessible mobile UI
- Delivered high-fidelity designs aligned with Nigerian fintech usability standards and trust signals

Tools: Figma

PluralCode

UI/UX Designer

October 2020 - March 2021 (6 months)

Lagos State, Nigeria

I designed UI and worked on UX for products at PluralCode, a leading African EdTech institute.

Key contributions:

- Translated brand and marketing strategies into engaging creative content
- Communicated page flows, animations, and interactive elements to stakeholders and engineering teams
- Worked closely with the engineering team to identify front-end issues and implement validated design solutions
- Collaborated across teams with front-end engineers, PMs, and marketing on key product decisions

وزارة الحج والعمرة - Ministry of Hajj and Umrah

User Experience Designer

August 2019 - December 2020 (1 year 5 months)

Riyadh, Saudi Arabia

I designed UX for Nusuk, Saudi Arabia's official digital gateway for Hajj and Umrah pilgrims. Part of Vision 2030's Pilgrim Experience Program, the platform serves 40M+ annual users worldwide.

Key contributions:

- Cut pilgrim entry waiting times by 35% through optimized service and navigation flows

- Designed scalable user journeys and information architecture for visa issuance, booking, maps, and spiritual guidance
- Built multilingual experiences in English and Arabic across web and mobile for a global audience
- Improved onboarding and usability for 40M+ users through ongoing research-driven refinements
- Partnered with cross-ministry teams on crowd management, emergency readiness, and real-time feedback systems
- Contributed to integrated payment, reservation, and digital mapping flows

Tools: Figma, Adobe XD

PluralCode

UI/UX Designer

January 2019 - March 2019 (3 months)

Lagos State, Nigeria

I supported the Senior Designer and got hands-on experience across web and mobile application launches at PluralCode.

Key contributions:

- Assisted the Senior Designer on web and mobile application launches, picking up real-world design processes
- Designed social media and brand content to support product marketing campaigns
- Ran user research and usability testing to inform design decisions
- Followed agile sprint cycles to meet project deadlines
